Product Information | Related Items | Product Downloads | Purchase History

The award-winning Olympus Chef's Haloumi is a mild, delicious and firm cheese that holds its shape well when grilled and still remains 'squeaky' soft on the inside. Made from pasteurised fresh cow's milk, Olympus creates curds and whey using non-animal rennet and starter culture, which is then moulded and hand-cut into rectangular portions.

Although it brings that traditional salty flavour, this haloumi has a lower salt content with a luscious texture that delivers a delicious golden-brown outer when cooked. This 1kg serving is easily portioned with consistency for a reliable product that you can count on for your food service.

- A firm and solid cheese with haloumi's distinctive rubber texture
- Specifically made for even portioning in restaurants and cafes.
- Best suited to grilling and pan-frying in 5mm thick portions.

Country of Origin	Australia
% Australian	99%
Allergens Contains	Milk
